

VOX STELLARUM:
OR, A LOYAL
ALMANACK
For the Year of HUMAN REDEMPTION
1809,

Being the First after Bissextile or LEAP-YEAR,
And the 49th of the Reign of his present MAJESTY.

IN WHICH ARE CONTAINED

ALL THINGS fitting for such a WORK; as,
A TABLE of TERMS and their RETURNS;

The Full, Changes, and Quarters of the MOON;
The Rising, Southing, and Setting of the SEVEN STARS,
and other fixed Stars of Note; the MOON's Age, and

A TIDE TABLE fitted to the same;

The Rising and Setting of the SUN; the Rising, Southing, and
Setting of the Moon; Mutual Aspects; Monthly Observa-
tions; and many other Things, useful and profitable.

UNTO WHICH ARE ADDED,

Astrological Observations on the Four Quarters of the Year.

A remarkable CHRONOLOGY; the ECLIPSES;
And other MATTERS both profitable and curious.

Observations on the Weather and Weather Glasses, Rain, &c.
And an HIEROGLYPHIC adapted to the TIMES.

By FRANCIS MOORE, Physician.

LONDON, ONE

Printed for the COMPANY of STATIONERS,
By William Thorne, Red Lion Court, Fleet Street.
And sold by GEORGE GREENHILL, at the Royal Exchange in Longate Street.
[Price One Shilling and Ten Pence stitched.]

Behold the early Year Mischief prepares,
 Mars to Sol, Venus to Chronus squares ;
 Hence Discords come, and hence Divisions flow,
 Hence Libels, lying News, and Traytors too.
 I wish their Rage might cease, and that my Pen
 Could Peace proclaim to Mortals once again.

I stand amaz'd, alas ! my tim'rous Quill
 Is stopp'd by Grief (and loth to shew its Skill)
 To see what Aspects in this Month are rang'd.
 What can they mean ? Sure, 'tis some mighty Change !
 When God intends great Punishments to send,
 He warns Mankind, by Signs, their Lives to mend.

M	Sun	Sun	Moon	Monthly Observations.
D	riser	sets	South	
1	3 53	8 7	2m 46	Rain fallen in June, 1807, at London, was one Inch and four-tenths. This was a warm dry Month. The Barometer stood mostly pretty high.
2	3 52	8 8	3 43	
3	3 51	8 9	4 36	
A	3 50	8 10	5 26	
5	3 50	8 10	6 13	LAST Quart. 5 day, at 2 morn
6	3 49	8 11	6 58	A heavy Rain on the 6th and 7th Days.
7	3 48	8 12	7 43	Rain, more or less, may be expected
8	3 47	8 13	8 27	about the 18th and 25th Days of this Month; the Day before or the Day after.
9	3 47	8 13	9 12	
10	3 46	8 14	9 57	
A	3 46	8 14	10 43	
12	3 45	8 15	11 30	
13	3 45	8 15	0 a 18	NEW Moon, 13 day, at 4 morn.
14	3 44	8 16	1 5	Some very considerable Consultations
15	3 44	8 16	1 53	are yet depending; and though we may
16	3 44	8 16	2 39	have some flattering Appearances to-
17	3 43	8 17	3 25	wards reconciling Differences, yet we
A	3 43	8 17	4 11	have Cause enough to fear no such Thing
19	3 43	8 17	4 57	will be as yet effected; but there seems
20	3 43	8 17	5 44	FIRST Quart. 20 day, at 12 night.
21	3 43	8 17	6 33	
22	3 43	8 17	7 24	to be a great Uncertainty in Public Af-
23	3 43	8 17	8 19	fairs. — The greatest Politicians and
24	3 43	8 17	9 16	Statesmen now find Work enough, and
A	3 43	8 17	10 17	many Embassies and Agents are dis-
26	3 44	8 16	11 20	patched from one Country to another.
27	3 44	8 16	morn.	FULL Moon, 27 day, at 3 aftern.
28	3 44	8 16	0 22	An Eminent Commander acts with
29	3 44	8 16	1 22	great Prudence.
30	3 45	8 15	2 19	

Now Troops appointed, from all Parts prepare
 To try their Strength once more in bloody War;
 For so the Stars, by thwarting Motions, shew
 A Storm at Hand, with Blood and Ruin too;
 All must obey when these for Arms prepare;
 There's Storms in States and Towns, as well as Air.

A warlike Officer meets Disgrace.

'Tis God directs the Motions of the Stars;
 As he permits, so have we Peace or Wars;
 'Tis God sets Bounds to Fate, prescribes a Law,
 To which his Creatures all must stand in Awe;
 'Tis he carves lofty Princes, makes them know,
 His Hand above it is, that governs all below.

18 SEPTEMBER 30 Days.

When Mars meets Saturn in the Scorpion's Nest,
 Malice and Fraud will the whole World infest ;
 Some Public Mischiefs they'll contrive to do,
 By Perjury, Plotting, perhaps Sedition too ;
 Whene'er these Planets whet their pungent Steel,
 Earth, Sea, and Air their strong Commotions feel.

13	6 36	5 24	3 57	
14	6 38	5 22	4 56	
A	6 40	5 20	5 54	I may now say, that if ever serious
16	6 41	5 19	6 49	FIRST Quart. 16 day, at 1 morn.
17	6 43	5 17	7 42	Councils and Consultations appeared in
18	6 45	5 15	8 33	Europe, this is the Time; and, we may
19	6 47	5 13	9 21	assure ourselves, that there are very
20	6 49	5 11	10 9	great Things in Agitation; and most
21	6 51	5 9	10 56	Nations, as well as our own, are very
A	6 53	5 7	11 42	FULL Moon, 28 day, at 9 morn.
23	6 55	5 5	morn.	willing to listen to the Accommodations
24	6 57	5 3	0 29	of Peace.
25	6 59	5 1	1 16	Great Application to Men in Power;
26	7 1	4 59	2 4	yet busy active Spirits create themselves
27	7 2	4 58	2 52	Trouble. And at this Juncture, great
28	7 4	4 56	3 39	Things depending, are managed with
A	7 6	4 54	4 27	much Secrecy.
30	7 8	4 52	5 14	LAST Quart. 31 day, at 1 afternoon.
31	7 10	4 50	6 0	

Gladly I wou'd of Europe's peaceful Fate
 Once sing, but find all Kingdoms, ev'ry State,
 Infected with — — —, Counsels betray'd,
 Designs defeated, some too long delay'd.
 Some blindfold run upon such dang'rous Shelves,
 Ruin their Neighbours first, and then themselves.

Upon the TWELVE SIGNS.

- ♈ The Head and Face the RAM doth always rule:
- ♉ The Neck and Throat are governed by the BULL.
- ♊ O'er the Arms and Shoulders still the TWINS preside:
- ♋ Breast, Stomach, Ribs, the crooked CRAB doth guide.
- ♌ The noble LION rules the Back and Heart:
- ♍ The bashful VIRGIN claims the Belly Part.
- ♎ The Reins and Loins the equal BALANCE weigh:
- ♏ The SCORPION o'er the Secret Parts doth sway.
- ♐ The curious ARCHER doth the Thighs affect:
- ♑ So doth the GOAT our bended Knees protect.
- ♒ The Legs unto AQUARIUS' Lot do fall:
- ♓ The FISH our active Feet their Portion call.

Common Notes for the Year 1809

Lunar Cycle, or Golden Number	5	Lent Begins	-	-	Feb. 15
- - - - -	5	Easter Day	-	-	April 2
- - - - -	14	Rogation Sunday	-	-	May 7
- - - - -	26	Ascension Day	-	-	May 11
- - - - -	3	Whit Sunday	-	-	May 21
Sundays after Epiphany	12	Sundays after Trinity	-	-	26
Number of Direction	12	Advent Sunday	-	-	Dec. 3
Septuagesima Sunday	Jan. 29				

A TABLE of Terms and Returns.

Hilary Term begins Jan. 23, ends Feb. 12.

	Returns, or Esseign Days.	Ex	Re	Ap.	W. D.
In eight Days of St. Hilary	- - -	Jan. 20	21	22	23 Monday.
In fifteen Days of St. Hilary	- - -	27	28	29	30 Monday.
On the Mor. of the Purif. of the Bl. V. M. Feb. 3	- - -	4	5	6	Monday.
In eight Days of the Purif. of the Bl. V. M.	- - -	9	10	11	13 Monday.

Easter Term begins April 19, ends May 15.

In fifteen Days of Easter	- - -	Apr 16	17	18	19 Wednesday.
From Easter Day in three Weeks	- - -	23	24	25	26 Wednesday.
From Easter Day in one Month	- - -	30	31	2	3 Wednesday.
From Easter Day in five Weeks	- - -	May 7	8	9	10 Wednesday.
On the Mor. of the Aisen. of our Lord	- - -	12	13	14	15 Monday.

Trinity Term begins June 2, ends June 21.

On the Morrow of the Holy Trinity	May 29	30	31	J2	Frida
In eight Days of the Holy Trinity	June 4	5	6	7	Wednesday.
In fifteen Days of the Holy Trinity	11	12	13	14	Wednesday.
From the Day of Holy Trin. in 3 Weeks	18	19	20	21	Wednesday.

Michaelmas Term begins Nov. 6, ends Nov. 28.

On the Morrow of All Souls	- - -	Nov. 3	4	5	6 Monday.
On the Morrow of St. Martin	- - -	12	13	14	15 Wednesday.
In eight days of St. Martin	- - -	18	19	20	21 Tuesday.
In fifteen Days of St. Martin	- - -	25	26	27	28 Tuesday.

N. B. No Sittings in Westminster Hall on the Second of February, Ascension Day, and Midsummer Day.

The Exchequer opens eight Days before any Term begins, except Trinity, before which it opens but four Days.

Note, The first and last Days of every Term are the first and last Days of Appearance.

KINGS and QUEENS from the CONQUEST.

* Ireland united to these Kingdoms, Jan. 1801.

BIRTH-DAYS of the ROYAL FAMILY.

KING GEORGE III.	June 4,	1738	Duke of Sussex,	Jan. 27,	-	1773
Queen Charlotte,	May 20,	1744	Duke of Cambridge,	Feb. 24,	1774	
Prince of Wales,	Aug. 12,	1762	Princess Mary,	April 25,	-	1776
Duke of York,	Aug. 16,	1763	Princess Sophia,	Nov. 3,	-	1777
Duke of Clarence,	Aug. 21,	1765	Princess Amelia,	Aug. 7,	-	1783
Ds. of Würemberg,	Sept. 29,	1766	Duchess of Brunswick,	Aug. 11,	1737	
Duke of Kent,	Nov. 2,	- 1767	Prince of Wales,	May 17,	1768	
Prs. Augusta Sophia,	Nov. 8,	1768	Duchess of York,	May 7,	51	
Prs. Elizabeth,	May 22,	- 1770	Prs. Charlotte of Wales,	Jan. 7,	79	
Duke of Cumberland,	June 5,	1771				

SOVEREIGNS of EUROPE, their Accession, &c.

Kingdoms, &c.	To whom subject.	When born.	Began to reign.
England, &c.	George III.	June 4, 1738	Oct. 25, 1760
France	Napoleon	Aug. 15, 1769	Dec. 15, 1799
Russia	Alexander	Dec. 23, 1770	Mar. 24, 1801
Spain	Charles IV.	Nov. 11, 1748	Dec. 17, 1788
Portugal	Mary	Dec. 17, 1734	Feb. 24, 1777
Prussia	Frederic Wm. III.	Aug. 3, 1770	Nov. 16, 1797
Denmark & Norway	Frederic V.	Jan. 27, 1768	Feb. 16, 1808
Sweden	Gustavus IV.	Nov. 1, 1778	Mar. 29, 1792
Austria	Francis II.	Feb. 12, 1767	Mar. 1, 1792
Popedom	Pius VII.	Aug. 11, 1742	Mar. 14, 1800
Sardinia	Victor Emanuel	May 24, 1751	June 4, 1802
Ottoman Empire	Mustapha	Sept. 7, 1779	May 29, 1807

The FULL WEIGHT of the Coins, with the LEAST WEIGHT allowed to pass of the Gold Coin.

Wt. allowed.	Full Wt.		Full Wt.	
GOLD	dwt. gr.	dwt. gr.	SILVER.	dwt. gr.
Guinea	- - 5 8	5 9 ³ ₀	A Crown	- - - 19 8 ¹⁶ ₃₇
Half Guinea	2 15	2 16 ⁴ ₈₀	Half Crown	- - - 9 16 ⁸ ₃₇
Seven Shillings	1 19	1 19 ¹³ ₈₀	Shilling	- - - 3 20 ²⁸ ₃₇
			Sixpence	- - - 1 22 ¹⁴ ₃₇

According to the above Proportions it appears, that the Value of a lb. of Silver is 62s. or 3l. 2s. and of a lb. of Gold is 44 $\frac{1}{2}$ Guineas, or 46l. 14s. 6d. Also that the oz. of Silver is 5s. 2d. and the oz. of Gold 3l. 17s. 10 $\frac{1}{2}$ d. So that the value of the standard Gold is 15 times that of the Silver, and 1-14th more.

TIDE TABLE.

A plain and easy TABLE, shewing the Time of HIGH WATER.

NOTE. That the Moon's Age being taken notice of in the Table, you have the Time of HIGH WATER at all the under named Places.

Beachy, Candado, Dover Pier, Dunkirk, Coast of Flanders, Kentish Knock, Leith, Portsmouth, and the Spits, Queenborough, Southampton, and Isle of Wight. Blackness, Calais and Dover, Downs, Gravetoe, Halt-tide, North-Cape before Cocquit, Ramsey, Scilly, and Thanet.

Amtercaan, Doit, Galcoign, Grouin, Hartlepool, Ireland in the Westward, London, Robin Hood's Bay, Rotterdam, Tinemouth, and Whitby.

Dal mount, Farnmouth, Guernsey, Humble, Lizard, St. Maloes, Newcastle, Ramsey, Seven-mouth, Schily, Storn, and Ternay.

Antwerp, Boston, St. David's, Hoins of Briton, Hull, Lundy, Lynn Half-tide, St. Pauls, Plymouth, Salcom without Uphant, Wareford.

Aldborough, Bristol, Farnmouth, and Foy, Fou ness, Lime, Sidmouth in the Channel, Start before St. Nicholas, Weymouth.

Caen, Calais Road, Cuves, Dover, the Firth, South Foreland, Harwich, St. Helen's, Normandy, and Picardy, Yarmouth Rad.

Beachy, and the Isle of Wight, Caffers in the Channel, Cobhay, Dublin, Hague, Peter-Port, St. Magnus's Sound.

14 29	10	2	11	54	1	12	3	54	4	32	5	57	9	12	7	57	0	8	45	
15 30	10	50	12	42	2	0	4	42	5	20	6	45	10	0	8	45	0	8	45	

NOTE. That the Moon's Age, being observed in the first Column, you find the Time of High Water at all the Places above-mentioned, in the respective Columns of Numbers immediately below them. Thus, when the Moon is 1 or 16 Days old, it is High Water at Beachy, Candado, Dover, &c. at 38 Minutes past 11 o'Clock. And so of the rest. As to the Moon's Age, you find it in the 6th Column on every left-hand Page of the Calendar.

A TABLE of the Equation of Time for regulating Clocks and Watches for 1809. Note, fa. Clock too fast, that is, your Clock, to be right, must be so much faster than the Sun Dial. flo. Clock too slow, that is, your Clock must be so much slower than the Sun Dial.

How to set a Clock or Watch by this Table. For Example, Jan. the 1st, I find, by looking into the Table, that a Clock to be right must be 3 Minutes, 55 Seconds faster than a Sun Dial, therefore I set it so much faster accordingly. And so of the rest. Twelve o'Clock is the best time to set a Clock or a Watch by a Dial.

Note, A Sun Dial shows Solar or Apparent Time, but a Clock, &c. should be set to Equal or Mean Time, as the Table directs, to go true.

A TABLE of the Rising, Southing, and Setting of the
Pleiades, or Seven Stars, for every 5th Day in the Year,
of excellent Use to find the Hour of the Night.

CHRONOLOGY
OF MANY
REMARKABLE OCCURRENCES.

Years of Christ.

Years since.

1066	WILLIAM (the Norman) conquered England	743
1116	First Parliament of Lords and Commons	693
1185	Ireland conquered by the English	624
1299	Windmills invented	510
1302	The Mariner's Compass invented	507
1304	Edward I. reduced Scotland	505
1330	Gunpowder discovered by a Priest	479
1369	Wickliff first began the Reformation	440
1441	Printing invented by a German	368
1483	Martin Luther, the Reformer, born	326
1492	Columbus discovered America	317
1521	Engraving on Wood invented by Albert Durer	288
1535	Cannon first used	274
1584	Virginia discovered by Sir Walter Raleigh	245
1590	Telescopes invented by Jansen, a Dutchman	219
1603	A great Plague in London ; died 56,570	206
1605	The Popish Gunpowder Plot, November 5	204
1610	Jupiter's Satellites first discovered	199
1611	New Translation of the Bible	198
1614	The New River brought to London	195
1616	Shakespeare the Poet, died	193
1625	A great Plague in London, died 34,517	184
1632	A great fire on London Bridge, Feb. 11	177
1634	Old Parr died, aged 152, he lived in Ten Reigns	175
1641	The cruel Irish Massacre, began October 23	168
1642	Edgehill and Brentford Fight	167
1642	Sir Isaac Newton born, December 25	167
1649	King Charles I. beheaded Jan. 30	160
1651	The bloody Fight at Worcester	158
1653	Oliver Cromwell made Protector, Dec. 12	156
1655	George Fox, the First of the Quakers	154
1658	Spring Pocket Watches, invented by Dr. Hook	151
1658	Oliver Cromwell died, Sept. 3	151
1660	King Charles II. restored, May 29	149
1661	King Charles II. crowned, April 23, at Westminster	148
1661	A great Storm in London, Feb. 18	148

1662	The Royal Society instituted	147
1665	A great Plague in London, whereof died 68,586	144
1666	The lamentable Burning of London, Sept. 2	143
1667	Peace with Holland, France, and Denmark	142
1667	The Royal Exchange built	142
1668	Peace proclaimed with Spain, Feb. 12	141
1669	The Royal Exchange first opened, September 28	140
1670	The Prince of Orange arrived at Whitehall	139
1670	Henry Jenkins died, aged 169	139
1672	War declared against the Dutch	137
1672	Halfpence and Farthings first coined, Aug. 16	137
1674	Peace with Holland proclaimed, Feb. 28	135
1677	Prince of Orange married to the Princess Mary	132
1678	The Popish Plot discovered	131
1679	The Habeas Corpus Act passed	130
1680	A great Comet appeared in December	129
1682	Another great Comet appeared	127
1683	The Penny Post Office established	126
1684	A great Frost that held 13 Weeks	125
1685	The Duke of Monmouth beheaded, July 15	124
1688	The seven Bishops sent to the Tower, June 8	121
1688	The Pretender said to be born, June 10	121
1688	Prince of Orange landed at Torbay, Nov. 4	121
1688	King James II. abdicated, Dec. 12	12
1689	King William and Queen Mary crowned, April 11	12
1692	Port Royal swallowed up by an Earthquake	117
1692	A great Earthquake in England, Sept. 8	117
1693	Hackney Coaches first licensed	116
1693	Bank of England established	116
1694	Lotteries first established	115
1702	Queen Anne declared War against France	107
1703	A terrible high Wind, Nov. 26 and 27	106
1704	Gibraltar taken by Sir George Rooke	105
1706	The Battle at Ramilles on Whit Sunday	103
1707	England and Scotland united, May 1	102
1708	The Pretender attempted to invade Great Britain	101
1709	The French beat in the Woods of Blanglise	100
1710	Great Riots and Disturbances in England	99
1713	Peace with France proclaimed, May 5	96
1715	A total Eclipse of the Sun, April 22	94
1725	The Rebellion in Scotland and Lancashire	94
1726	A great Frost; a Fair on the Thames	93
1728	The first Appearance of the Northern Lights	91
1729	A great fiery Meteor, March 19, at 8 at Night	90
1737	The great Sir Isaac Newton died, March 20	82
1737	An Earthquake in several Parts of England	82

CHRONOLOGY.

35

1739	A hard Frost for 9 Weeks, began December 24	70
1743	The Battle of Dettingen, June 16	66
1744	Anson completed his Voyage round the World	65
1745	A Rebellion in Scotland	64
1746	The Scotch Rebels defeated at Culloden, April 16	63
1748	A general Peace concluded, October 7	61
1750	Westminster Bridge finished, cost £389,500	59
1750	Earthquake in London, Feb. 8, and March 8	59
1752	The Style and Calendar altered, September 2	57
1755	Lisbon destroyed by an Earthquake	54
1756	War declared against France	53
1758	A large Comet appeared, foretold by Dr. Halley	51
1760	King Geo. II. died, Oct. 25, K. Geo III. procl. 26	49
1762	A great Snow for 18 Days together, in Feb.	47
1763	A general Peace proclaimed, March 22	46
1765	Otahite in the South Seas discovered	44
1765	General Warrants declared illegal	44
1766	Gibraltar almost destroyed by a Storm	43
1770	Blackfriars Bridge finished, cost £152,840	39
1772	The Swedes forced to resign their liberties to the King	37
1775	War declared against North America, August 3	34
1776	The Americans declare themselves Independent	33
1778	The French sign a Treaty with the Americans	31
1778	War against France commenced	31
1779	War against Spain begun	30
1780	War against Holland commenced	29
1781	Georgium Sidus discovered by Herschel	28
1783	A general Peace	26
1783	Fiery Meteor passed over England, Aug. 18	26
1785	A great Frost for 16 Weeks	24
1789	A Revolution in France	20
1789	A great Frost for 3 Months	20
1792	Leopold, Emperor of Germany, died	17
1792	King of Sweden shot at a Masquerade by Ankerstrom	17
1793	France declared a Republic	17
1793	King and Queen of France beheaded	16
1797	Spanish Fleet defeated by Earl St. Vincent	12
1798	French Fleet defeated near Egypt by Lord Nelson	11
1801	Ireland united to England	8
1801	The Planet Piazzi discovered	8
1801	A general Peace	8
1802	The Planet Olbers discovered	7
1803	War with France renewed	6
1804	The Planet Harding discovered	5
1805	French Fleet defeated off Trafalgar, by Lord Nelson	4
1807	The Portuguese Government emigrated to the Brazils	2
1807	Olbers's Second new Planet discovered	2

AN ACCOUNT OF THE
ECLIPSES of the SUN and MOON,
And other Appearances in the Heavens,
In the Year 1809.

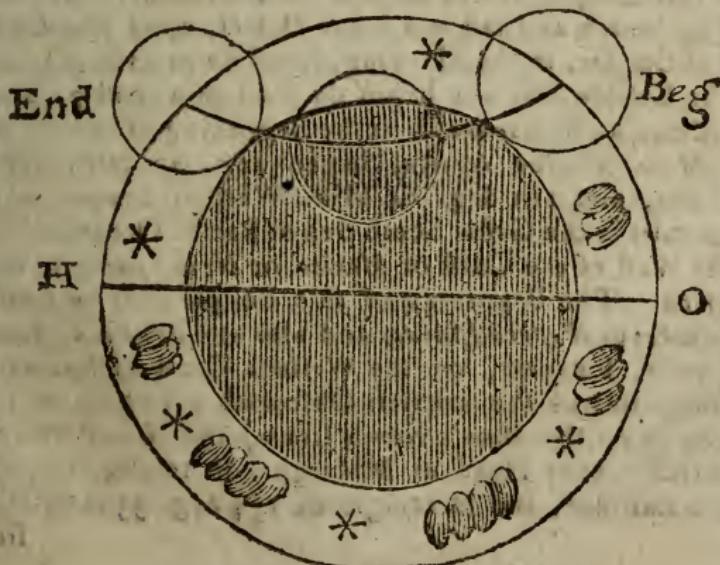

CALCULATED FROM NEW AND IMPROVED SOLAR
AND LUNAR TABLES.

Founded on the Newtonian System of Gravitation,
And agreeing with Observations to a surprising Exactness.

THE two great Lamps of Heaven will this Year afford
four Eclipses, namely, each Luminary two. These
will happen in the following Order:—

The first is a central and annular Eclipse of the Sun,
upon *Friday* the 14th of *April*, in the Evening, with re-
spect to us, but so late as to be invisible; for the Ecliptical
Conjunction happens at 57 min. past 7 o'Clock. This
Eclipse is central on the Meridian, at 36 min. past our
8 o'Clock, in Latitude 74 deg. North, and 128 deg.
53 min. West from *London*; which Place falls in the Icy
Sea, within the Arctic Circle.—This Eclipse will be seen
in *Hudson's Bay*, in *North America*, and on the Eastern
Coast of *Asia*; and along the Track of central Appearance
and Parts adjacent, instead of an astonishing gloomy Dark-
ness, the Spectators will be entertained with a splendid
Annulus, or Ring of Light, encompassing the *Moon's* dark
Body on every Side.—The second Eclipse of this Year is
of the lesser Light the *Moon*; the Defect happens in the
9th deg. of *Scorpio*, upon *Saturday* the 29th of *April*, at
Night, and visible here if Clouds interpose not.—At the
Beginning of this Eclipse, the *Moon* will be vertical or
directly over head, in 13 deg. 49 min. of South Latitude,
and in 12 deg. 53 min. East Longitude from *London*;
which Place falls on the Western Coast of the Kingdom of
Benguela in *Africa*, the Climate of which is very perni-
cious to Europeans. At the Middle of this Eclipse the
Moon will be vertical in 14 deg. 2 min. South Latitude,
and in 8 deg. 45 min. West Longitude from *London*,
which Place falls a little to the North West of the Island of
St. Helena, in the *Atlantic Ocean*, which Island belongs to

the English East India Company.—At the End of this Eclipse the *Moon* will be vertical in 14 deg. 16 min. of South Latitude, in 30 deg. 20 min. of West Longitude from *London*, which Place falls near the Eastern Coast of *South America*, near to the *Brazils*. From all which it appears, that the Beginning of this lunar Eclipse will be visible in the *Bay of Bengal*, and to all the Islands in the *Indian Sea*; but the *Moon* will set eclipsed in the aforesaid *Bay*, before the Time of greatest Obscuration, and also about that Time in the Island of *Ceylon*.—Soon after the Beginning the *Moon* will rise in the Island of *Jamaica*, and also at the Island of *Hispaniola*, in the *West Indies*.—Hence it also appears, that this Eclipse will be visible to all *South America*, a small Part of the Eastern Coast excepted; to all *Africa*, and the Island of *Madagascar*.—The Beginning of this Eclipse will not be visible in *North America*, except at the Island of *Newfoundland*, but the *Moon* rises eclipsed, more or less, in all those Parts. The whole of this Eclipse will be visible to all the *Caribbee Islands* in the *West Indies*, and also to the Island called *Sandwich Land*, and the Island called the *Southern Georgia*, situated in the great Southern Pacific Ocean; one of these Islands was discovered by Capt. Carteret, in 1767, and the other by Capt. Cook, in 1775. In this Island of *Great Britain* it may be expected to happen according to the following Type and Calculation:

April 29th.	Edinburgh.	York.	London.
	h. m. s.	h. m. s.	h. m. s.
Beginning	10 52 39	11 1 1	11 5 28
Middle -	12 22 41	12 31 3	12 35 30
Opposition	12 28 14	12 36 36	12 41 3
End - -	13 52 43	14 1 5	14 5 32
viz. Sunday	1 53 43	2 1 5	2 5 32

Digits eclipsed $10^{\circ} 29' 43''$.

Note.—H. O. an Horizontal Line.

The third Eclipse, is another of the Sun, upon Monday the 9th of October, at 43 min. past our 7 in the Morning: But by Reason of the Moon's South Latitude, this Eclipse is invisible to us, notwithstanding its falling in the Day Time; and not to us only, but to all Europe.—In the remote Southern Parts of the World this will be a very great Eclipse, for at 17 min. past our 8 o'Clock the Sun will be centrally eclipsed on the Meridian, in Longitude 55 deg. 45 min. East from London, and in Latitude 61 deg. 40 min. South, which Place falls in the Great South Sea, among firm Fields and Islands of Ice; but whether this Eclipse will prove total, I cannot positively say, for by my Calculations the Diameters of the Sun and Moon are very nearly equal, so that a small Error, either Way, will make it either total or annular, but without Continuance.—I expect this Eclipse will be seen in New Holland.

The fourth and last is a lunar Defect, upon Monday the 23d of October, in the Morning, invisible to us in England, as the Eclipse will not begin until 41 min. past 7, under the Meridian of London.—At the Beginning of this Eclipse the Moon will be vertical in 10 deg. 36 min. North Latitude, and 111 deg. 54 Min. West of London, which Place falls in the Great South Sea or Pacific Ocean, a little to the West of the Coast of Mexico, or New Spain, in North America. The Beginning of this Eclipse will be seen at the Azores or Western Islands, and also at Cape Verd Islands, and even, I expect, on the Western Coast of Ireland.—At the Time of the greatest Obscuration (which will be 10 Digits on the Moon's North Limb) the Moon is vertical or directly over Head at Midnight, in 10 deg. 50 min. North Latitude, and in Longitude 134 deg. 35 min. West from

from *London*, which Place falls in the same Great Pacific Ocean ; and at this Time the *Moon* sets eclipsed at *Cape Horn*, and on the Eastern Coast of *South America* ; but the *Moon* rises eclipsed on the Coast of *New Holland*, called *New South Wales*, a little Time before the greatest Obscuration. — At the End of this Eclipse the *Moon* will be vertical in 11 deg. 4 min. of North Latitude, and 157 deg. 15 min. West Longitude from *London*, which Place falls in the same Great Pacific Ocean, near upon the Track of *Lord Anson*, in his Voyage round the World.

This Eclipse will be visible from the Beginning to the End, at the *Society* and *Friendly Islands* ; but the *Moon* will rise eclipsed at the *New Hebrides*, *New Caledonia*, and *New Zealand*, and also on the Island of *Japan*, and on the Eastern Coast of *Asia* ; the End will also extend itself to the *Philippine Islands*, and the Island of *Borneo*, in the Indian Ocean, formerly thought to be the largest Island in the World ; but the largest in the World is now found to be *New Holland*, in the great South Sea.

Other Appearances in the Heavens.

FOR the Sake of the Curious, that have proper Telescopes, I give the following Occultations of the fixed Stars by the *Moon*, that will be visible to us in an Evening ; as computed from correct Astronomical Tables, for the Meridian and Latitude of *London*, according to app. Time.

1. On *Monday, Feb.* the 27th, in the Evening, the *Moon* eclipses *Alpha Cancri*, a Star of the 4th Magnitude.—The *Moon's* Eastern Limb will take the Star at 5 min. past 8 o'Clock ; and the *Moon's* Western Limb will leave the said Star at 15 min. past 9 ; after the Star has been hid 1 Hour and 10 Min. The Star will appear to the North of the *Moon's* Centre.

2. On *Saturday, March* the 4th, the *Moon* eclipses a notable Star of the first Magnitude, called the *Virgin's Spike*, or *Spica Virginis*. This will make a pretty Appearance through a Telescope, should the Air prove favourable ; for the Star will immerge behind the Eastern Edge of the *Moon*, at 20 min. past 10 o'Clock at Night ; and will again emerge from behind the Western Edge of the *Moon* at 45 min.

min. past 10; after being hid by the *Moon* 25 minutes.
 Note.—The *Moon's* lower Limb will take and leave the Star.

3. *Sunday, May the 28th*, the *Moon* will eclipse a small Star in *Scorpio*, of the 4th Magnitude.—Immersion at 45 min. past 10 at Night, and the Emersion will be at 54 min. past 11 o'Clock.

4. *On Thursday, September the 28th*, the *Moon* will eclipse two small Stars in *Taurus*, namely, 1 *Delta*; and 2 *Delta*; they are of the 4th Magnitude.—The *Moon's* Limb takes the first of these Stars at 33 min. past 8 at Night, and that of the second at 52 min. past 8; and the first Star will appear again from behind the *Moon*, at 9 min. past 9; and the second Star comes out at 48 min. past 9 o'Clock.—The first of these Stars passes more North of the *Moon's* Centre than the second will.

5. *On Tuesday, December the 19th*, the *Moon* again eclipses the same two Stars in *Taurus*; the Immersion of the first Star will be at 10 min. past 5 o'Clock in the Evening; and the Immersion of the second Star will be at 41 min. past 5; and the Emersion of the first Star will be at 11 min. past 6, and the Emersion of the second will be at 47 min. past 6 o'Clock. The first of these Stars passes North of the *Moon's* Centre, and the second will pass to the South of the *Moon's* Centre.

Upon the COMET that appeared in the Autumn of the Year 1807, vulgarly called a BLAZING STAR.

THIS Comet made its first Appearance (or at least was noticed) towards the End of September, after it had past its Perihelium, and was returning from the Sun. It performed its apparent Course through the Constellations of the *Serpent*, *Hercules*, &c. The last Time I saw this Comet was on the 6th of December, at 7 in the Evening (as my Observations of it were often interrupted by cloudy Weather) when it was, I found, advanced far above the bright Star in the *Harp*, and near to the small Star in the Bill of *Cygnus*, or the *Swan*; the Comet then appeared very small, so that I could not see its Tail, even with a good two-feet Achromatic Telescope. Now, Comets appear

appear only during that little Part of their Course which they describe in the Neighbourhood of the Earth, the rest is performed in the most distant Regions of the Heavens, during which Time they are lost to us; and when a *Comet* returns, we can have no Knowledge of it but from searching anterior Records of *Comets* which have appeared before, and comparing their Elements together. It does not appear that the Elements of this *Comet* will tally with any on Record, and was not expected, but came and burst upon us quite unknown; and, indeed, after all that has been said and done by learned Men, to determine the Nature of *Comets* and their Tails, our Acquaintance with them is still very limited.—Many of the Operations of Nature are carried on in her great Laboratory which we cannot comprehend; but now and then we see some of the Tools with which she is at Work. There is a Mystery in the Destination of *Comets*, which seems to place them in the allegorical View of Tools, probably designed for some salutary Purposes to be wrought by them. It may be that the Vapour which composes the Tail of a *Comet*, by being perpetually rarefied and dilated, may at last be dissipated and scattered through the whole Heavens; and, by little and little be attracted towards the Planets by its Gravity, and mixed with their Atmospheres, and contribute to supply the Wastes of planetary Fluids, spent upon Vegetation and Putrefaction; and it is, perhaps, chiefly from *Comets*, that we have the most subtle and useful Part of our Air, so necessary to preserve the Life of all Things with us. I now give the curious Readers the Elements of the Orbit of the COMET of 1807, from Observation. Mean Time of the Perihelium adapted to the Meridian of LONDON.

Sept. 19^d. 6 h. 34m. A.M.

Perihelium Distance 0,647.

METEOROLOGICAL OBSERVATIONS, &c.
*Relating to the Year 1807; with Remarks on the
 Barometer, or Weather Glass.*

HAVING of late Years spoken much in my Almanacks of the Alteration of the Weather from the Positions of the Planets, and their Influences on the Air, or Atmosphere; but in an Island like ours, so subject to a Variety of Alterations in the Winds, (on which the Weather in this Country so much depends) such Fore-knowledge, with Certainty, at all Times, cannot be expected; yet, nevertheless, I shall, from Year to Year, endeavour to give the best Judgment I can; as also towards perfecting the Theory of the BAROMETER or WEATHER GLASS, which I have made my Study and Care for more than forty Years. My Readers will find, I have as usual, on the Right-hand Pages, under the Depth of Rain fallen at *London*, given the Time to a Day or Two, when there is a probability of *Snow* or *Rain*, &c. (more or less in Quantity) within the Triduum or Compas of Three Days, deduced from Astrological Rules and Philosophical Principles, as is also the Weather given in the Columns, on the Left-hand Pages of each Month. These Observations of mine concerning the Weather, are to be clated with a good Weather Glass, which is an Instrument by which we can see the Variations in the Gravity or Weight of the Air; from whence we judge what Changes in the Weather are likely to take Place. There is one Observation to be noticed, which perhaps all are not sufficiently acquainted with, and that is, the shifting of the Winds; for in this Country, the greatest Height of the Mercury in the Tube is mostly found upon an Easterly or North-Easterly Wind; and very often, when the Wind blows from thence, or is about shifting into these Quarters, we may have *Snow* or *Rain*, notwithstanding the Quicksilver may stand pretty high in the Tube, and even be in a rising State. This I advise my Readers to attend to, lest they give a wrong Judgment concerning the Weather, and then blame their Weather Glasses, though made on the best Principle.

The *Spring* was rather backward. The coldest Day was *January* 15th; and *May* the 25th, and *July* 22d, the Two hottest Days in the Year; for on the former Day, the Thermometer with us in the Shade (within Doors), was at 78 Degrees, and on the latter 80 Degrees.

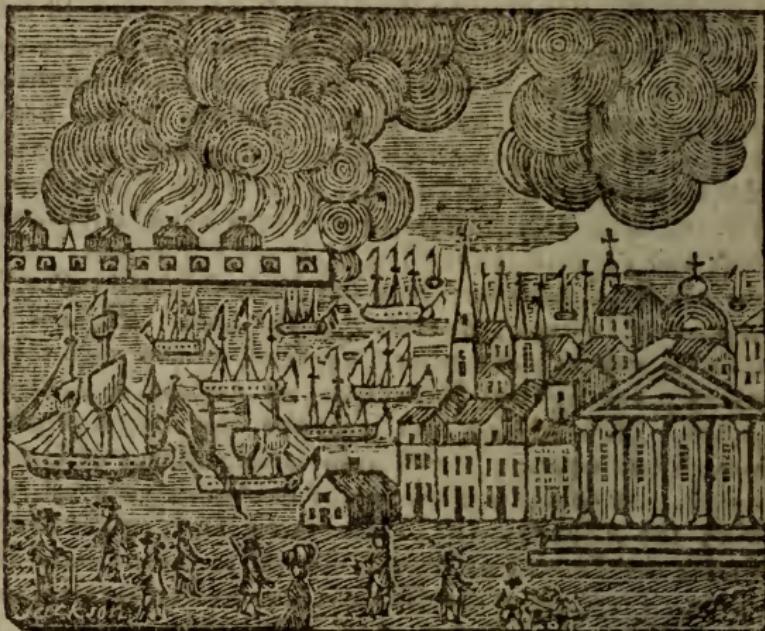

Judicium Astrologicum pro Anno 1809.
Vox Cœlorum, Vox Dei. The Voice of the Heavens is
the Voice of God.—He speaks in all the Changes of the
Seasons, and of the Times.

COURTEOUS READER,

God's Judgments are still abroad in the Earth; I wish the People of all Nations and Countries would take Warning thereby, and learn Righteousness. Britain groans under the Pressure of heavy Taxes, and other Burthens, heretofore unknown; her Manufacturers are thrown out of Employ, and her Commerce greatly crippled; yet, alas! Britain continues in her Sins. If we turn our Eyes around, we behold Kingdoms shaken to their very Foundations, and Kings and Potentates tumbled from their Thrones. Germany has been ransacked, and her Hosts subdued; Prussia, Spain, and Portugal, humbled in the Dust. Holland reduced, as well as some other Countries, to the most abject Slavery; and rightful Sovereigns, of various Kingdoms, deposed. Let Britain not provoke the overwhelming Blow, by outwearing the Goodness and Mercy of Omnipotence. A splendid Comet made its Appearance last Autumn; the Apparition of Comets in an Astrological Sense, contains the Fate of all People subject to their Circle and Motion. The Fate of the different Countries (at this Time of my Writing) are not yet finished; true it is, that in some Countries it is begun, and a Foundation laid for acting greater Matters, when Time and Opportunity offer; the Sword, I fear, hath not yet done its Part so sufficiently as it must do. It is just Forty Years since a former splendid Comet appeared, when a Person was then born in the Island of Corsica, who had this Comet in the Tenth House of his Nativity; and if we observe the Position of the Heavens at his Birth, in Relation thereto, we shall find, That that Man would act his Part upon the Stage of Europe with so much Success, that it would not be in the Power of any Prince, King, or Nation, to resist him effectually; yet, I say, he will not die Aged; he has yet got to conclude, and finish that Dance he has begun.—Matth. xx. v. 6 & 7; Ye shall hear of Wars, and Rumours of Wars, &c. For Nation shall rise up against Nation, and Kingdom against Kingdom, and there shall be Famines and Pestilence, and Earthquakes in divers Places. I never read yet, that

God would take away this for the *Elects*' Sake; indeed, I have read, that he will shorten the Days for the *Elects*' Sake; for Saints must not think to live in an evil World, and not be Partakers of the Punishments of the World.

I now present my Readers with an HIEROGLYPHIC alluding to the present Times.

Observations on the Four Quarters of the Year, as deduced from the Influx and Influences of the Planets, operating therein.

Of the Brumal Ingress, or Winter Quarter.

It hath been customary, as well as necessary, to begin with the Winter Quarter, as it all falls within the New Year, excepting a few Days; and it takes Place at that Moment of Time, when the Sun begins to return from the Southern Tropic, which, according to my Calculations, happens on *Wednesday*, the 21st Day of December, 1808, at 51 min. past 10 o'Clock at Night; at which Time 18 deg. of $\text{\textit{\alpha}}$ are ascending in the East, and 14 deg. of $\text{\textit{\alpha}}$ are on the Mid-heaven. The Planets at this Time are all under the Earth; and in looking over the Figure, I find the Planet *Mars* in $\text{\textit{\alpha}}$, in the Eastern Angle; the Planet *Saturn* in the 3d, just leaving the Sign *Scorpio*, and has lately been in $\text{\textit{\delta}}$ of $\text{\textit{\delta}}$; the Sun is also angular in the 4th, and has lately been in a \square of $\text{\textit{\delta}}$; the *Moon* is

posed in the 6th, in ~~xx~~, and applying to the ☽ of *Saturn*, and ad *vac.* & of *Jupiter*. These are the principal Configurations of the Planets of this Tropical Ingress. My Readers, no doubt, are now in Expectation of what I shall say, respecting the War, and the Politics of *Europe*, &c. By the Configurations of the Planets at this Ingress, it seems that the Face of Affairs is very hush and private in most Parts of *Europe*, &c. Yet, I say, after a Summer of Expeditions, War, and Bloodshed, strange Occurrences are on the Anvil of State; for the Powers of *Europe* are still much divided among themselves, so that each Power is seeking its own Interest, rather than the Common Good: and this has been the Case with the Northern Powers, through *French* Influence, Power, and Politics; and should a Negotiation for a GENERAL PEACE be not speedily set on Foot (and it might have been last Year and the Heavens favoured the Design) the Emperor of *France* will still keep to work, in contriving and carrying on Designs against our Land and Nation. A Revolutionizing Spirit has entered *Portugal* and *Spain*, and is fermenting among the Inhabitants of *Rome*, *Naples*, *Turkey*, and other Places.

Of the Vernal, or Spring Quarter.

SUN'S INGRESS into ARIES.

This Quarter commences on *Monday* the 20th Day of *March*, at 14 min. past *Twelve at Night*; at which Time the Positions of the Planets are exhibited in the above Scheme; where the 4th Degree of Δ culminates, and the 6th Degree of \sharp ascends; the *Moon* has just past a δ of φ , and next applying to an δ of \mathfrak{h} , who is retrograde on the Cusp of the *Ascendant*. In this vernal Figure I find the Planet *Mars*, though posited in the 10th, is in his *Detriment*; and the Planet *Saturn* entering into the Sign *Sagittarius*; these, with the other Configurations, shew that some great Changes are still approaching various States and Kingdoms, and amongst the rest, the *Spanish* and *Portuguese* Nations, those great Props and Supporters of Papal Power and Superstition. The Powers of *Italy*, &c. are in the greatest Distress, and they all will find none that can effectually relieve them. The different Powers in the North, and in *Germany*, are in the same Situation. As to the United States of *America*, they must take Care of *French* Counsels, and *French* Politics. During the Years 1807 and 1808, first one Power and then another Power, made Peace with *France*, as I had some Expectations they would, from the Face of the Heavens, and as I hinted in my Almanacks; but *Britain*, unhappy *Britain*, kept behind, and continu'd the wide wasting War! Now, if the Foundation for a general Peace has not been laid, or began before this Time, or near this Time, I am of Opinion this is not the Year when Peace shall wave her Olive Branch over the whole World. Indeed, there will be Discords, Bloodshed, and Revolutions in the North of *Europe*, as well as other Places; but there is a Hand unseen, which brings Good out of Evil; and private Calamities shall at last produce a public Good. The Almighty works by Ways inscrutable to Men. The *French* Government is still very active with their Sword, and also in their Councils; so also is the *British* Government, to the no small Mortification of the *French* Emperor. Ambassadors, or Agents, are at Work to procure new Alliances, by Marriages, as well as other political Methods. Losses and Discouragements attend some worthy Merchants; and much Dissention, Strife, and Discord, amongst all Men; great Complaints of heavy Taxations, with murmuring and repining against Men in Authority. The Countryman or Farmer meets Encouragement for his Pains, in follow-

ing his Vocation, and finds no hard Season to contradict his Hopes (except in the political World), the Earth yielding her Increase happily, with all other Things that the Spring affords.

Of the Festival or Summer Quarter.

This Quarter begins on *Wednesday* the 21st Day of *June*, at 56 min. past 9 at Night, when the first Degree of *Sagittarius* will be on the Cusp of the Medium Cœli: and the 29th Degree of *Capricorn* will be on the Ascendant; the Planets *Saturn*, *Mars*, and the *Moon*, are then above the Earth; the rest of the Planets are below the Horizon. $\textcircled{4}$ and $\textcircled{3}$ are in a Zodiacal \square , and *Mars* in Δ hastening to a $\&$ of $\textcircled{4}$ in *Aries*, *England*'s Ascendant; the *Moon* is applying to an $\&$ of $\textcircled{3}$, and $\&$ of $\textcircled{4}$, and \square of $\textcircled{3}$ in *Cancer*; Equinoctial and Tropical Signs. These are sanguine and malignant Aspects, implying no great Good to Mankind, in a political Sense; but on the contrary, such as Commotions, Wars, and Bloodsheds, Seditions, Subversions of Kingdoms and States, Alterations of Laws, Customs, &c. both in Church and State. Many eminent and extraordinary events and Alterations will shortly come to pass, and shew themselves upon the Stage of *Europe*. The *French* as well as *England* appear very formidable, and what the Consequence will be Time will shew. I hope Peace and Tranquillity are still likely to reign in *Ireland*, as I expect some Complaints from that Quarter; all Countries sigh for a Cessation of Hostilities. At *Rome* we continue to discern the Handwriting against the Wall, *MENE TEKEL*; it is still flashing against the *VATICAN*. *America* is likely to suffer by Conflagrations, and the Ravages of Febrile Diseases, and by intestine Commotions, which in some Degree may be felt in *Russia*, *Scotland*, *Prussia*, *England*, *Greece*, *Germany*, and *Holland*. Many noted Persons that have sometimes lived in Splendor, do now, nolens volens, break, and turn Bankrupts. I am heartily sorry I must be the Messenger of such ill News; but according to the general Rules of Art, this Scheme and Year portends no less; and who can make melodious Music upon an ill-tuned Instrument?

Of the Autumnal Quarter.

Which makes its Entrance on Saturday the 23d of September, at 49 min. past 11 o'Clock in the Morning, at which Time we have 27 Deg. of *Virgo* culminating, and first Deg. of ♍, upon the Horoscope. The Positions and Configurations, at this Ingress, denote Strife and Discord among all Degrees of Men; but more especially amongst Kings, Princes, Senators, and those at the Helm of Affairs, giving Disturbance and Fatigue to their Councils and Deliberations, with Loss and Detriment to Persons of high Rank, with Removals and Disgrace to those in Trust, &c. whilst potent *Mars*, the god of War, proceeds boldly in the Enterprize, driving before him all such as dare to oppose the Torrent; in which Enterprizes the Arms of a certain Nation seem to have no small Share, either in Action or Glory. The potent Planet *Jupiter* has this Year been passing through *Aries*, which is esteemed the Ascendant of *England*, which I hope will put Life and Vigour, tempered with Justice, into *British* Councils, so as to produce the amicable Agreement of some potent Powers for the Good of States and Kingdoms, and the People in general; I wish it good Progress.

While Heaven has Motion, Changes there will flow,
 From heavenly Influx 'tis that we foreknow
 Those mighty Actions which on Earth appear,
 According to Prediction Year by Year;
 Accept such Cautions therefore for your Good,
 As from Heaven's mystic Text are understood;
 No Man can every Person's Humour fit,
 For some through Envy, some for want of Wit,
 Have ever treated Authors with Abuse,
 Such is the World's base Vice and foolish Use.
 If Fools still carp, whose Minds are ill at Ease,
 Such Foes I scorn, wise Friends I seek to please.
